“Create a Life of Pure Love & Total Health”

Panel: Almine, Professor James J. Hurtak, Raymon Grace & Eric Pearl

PROFESSOR JAMES J. HURTAK

LOS GATOS, CALIFORNIA

Professor Hurtak (Social Scientist and Futurist) is founder and president of the International Academy for Future Science, a worldwide educational and scientific association. He is a noted archeologist, philosopher, researcher, author, and worldrenowned authority on space research and ecology. He is an international lecturer on the ethical question of cloning. He was formerly a professor at California State University, at Northridge and LA. He was invited to speak to a special committee at the UN on four occasions on archeological evidences and philosophy of the ancients, and was an invited participant at the United Nations Global Summit of Religious Leaders in 2000. In his capacity as an international consultant, he has been featured in numerous film documentaries and appeared on television programs throughout the world. He has presented his scientific research before the Academy of Science in Moscow and Beijing, and has published numerous technical papers.

*He is the author of four books including his most famous book, **The Book of Knowledge: The Keys of Enoch** (translated into seven languages). The Keys of Enoch tells us that human life was engineered by the highest Divine levels of Life, and describes the physical and spiritual transformations presently occurring in our galaxy. It indicates that the human mind and body can be electrified to higher energy states under certain circumstances due to Light radiations described as Hasmal energy forces and Al-him particles (Hebrew). The brain not only is able to process the light of our known electromagnetic spectrum, but is also able to reach beyond the constrictions of local magnetic fields and receive light from other electromagnetic spectrums - from the Light that comes from above.*

* * * * *

I thank all of you for this electrifying moment and I share with the previous speaker, the importance of the symbols of Mu, and the finding of ancient language that connects the missing pieces. Truly if we are to heal the planet through love, we must realize we are working with all cultures, all peoples, particularly those regions that have been overlooked. Academy for Future Science website: **www.affs.org**

Several years ago when I was invited to China, my purpose was not simply to appear before the Academy of Science, but to go to the mountains of Tibet to pray with the Tibetan monks for the preservation of the Tibetan people, to work with the lost cultures of the Gobi Desert; to go beneath the sands of the Takla Makan basin, all of these missing pieces of the planetary *mandala*.

I will enlarge upon the symbol Almine gave us of the doilies or the spider web and use a **grid**. We connect the grids where the **energy points** of the planet (like the acupuncture points in the human body) come alive. And when we take this to a much higher level of love, forgiveness and understanding, that grid begins to radiate and becomes what is known in Eastern science as the Mandala, the Wheel of Divine Experience. This relates also to the pattern of the Rosette

window, the sacred geometries of the West, the North and the South. And so as we fill in the missing pieces, it is important for us to understand the quantum change that is upon the planet at this time, to go beyond the scenarios of war, death and strife, the old dialectic, which keeps the consciousness boxed into the body, and reverse that scenario to open up the chakras, the Seven Seals, to go to a much higher level of vibration and to reach out with the wings of the dove in all directions in unity and oneness for consciousness is One and the Divine.

We have actual evidence now of ancient civilizations being found that used consciousness and musical vibrations to operate on a much higher level of understanding. And when that was lost, there was a split in the psyche. We have found beneath the waters of Japan, in the last few years, something that was illustrated in one of the plates or maps of *The Book of Knowledge, Keys of Enoch*, published in 1973. The map shows **12 gridlines of ancient cultures throughout the world** that are very important for what is called *Proto-communication*, or higher communication. One is exactly off the area of Taiwan and the small island of Yanaguni, where vast underwater structures have been found. I have been there. A film has been made with the Japanese authorities (now being released) showing that history is much older. But more than that, on the top of one of these temples is the shape of a *turtle* - a unique turtle symbol there on the bottom of the ocean - which is very important for the symbolism of the indigenous people, not only of the Pacific, but the Indian nations of North and South America.

Another area where we have worked is in the Middle East in Egypt where we were able to use ancient *mantrams*, the names of God, to vibrate the whole inner structure of the Great Pyramids. When this took place, pure physical light momentarily filled the interior chambers. We have actual pictures of this light. What is the importance of this? The Great Pyramid not only produces energy but *it produces music and vibrations*.

And if this is used as the touchstone for healing, as one of our musical mandalas, it can reach out to all the countries of the Middle East. If we can tap into the ancient mandala of the temples of Mu off of Japan, Yanaguni, we can fuel that region of China, Tibet and North Korea, with the energy of love, transformation, and understanding that is needed.

DR. HURTAK'S PRAYER:

I am going to play now an excerpt of music that we have developed on the theme of forgiveness, for what the world needs to do is forgive, to overcome the old thought forms that play into dualism and destruction. And so as you hear with me now the music and the special lyrical text, understand that this prayer is one of many going out world-wide in many languages and it can be used effectively for healing on each and every individual who wishes unconditional love and forgiveness to work on all seven levels. Let us close our eyes, let us feel the energies first through our body temple and then we are going to expand upon this as we connect with the key temples that are now being discovered in archeology and geology in music experience.

In the name of the Divine Lover, who calls us into the marriage banquets of the upper chamber, may we begin with our selection. Now, as we take a deep breath and hold the energy, now that we have activated our body as a musical vessel, a vehicle of light, we revisit the Near East. We see the Great Pyramid and we realize the capstone is missing, for that capstone is each of us. We are the higher architecture that completes that ancient symbol. And as we position ourselves upon the Great Pyramid with the power of the mind's eye and scan over all the countries of the Near East, we become the beacon of light and we vibrate the intensity of the energy that is there. And as we send light and forgiveness we visualize the children of the Near East holding hands on all sides and we pray for the peace that passes all understanding

to overcome and to quicken the forces of light. And we project ourselves to the mountains at the north of the Golan Heights, Mount Herman and as we stand upon this mount (some scholars feel is the true Mount of Transfiguration), we create in our power of our mind's eye a shrine to the Holy Angels, for all three great religions of the Middle East share the same angels. We give thanks to the Godhead, known as the *Elohim*. And we give thanks to the holy *Shekinah* as it is called by the prophets, the Divine Presence. To the power of the Eternal Christ and all teachers of Divine work and vibration we ask that this light descend and so be it in balance and unity. And we quickly pass, also now, across the Near East to the Great Pyramids that have been found off the coast of Taiwan and Japan. In this critical area also, amongst the political thunder of North Korea and Taiwan, realize the importance of why these ancient pyramids are there to remind us of the ancient vibrations of Mu, the names of which were given to those who came from the higher worlds, in fact, the first Japanese teachers, Ki Mu and Ji Mu vibrate the name and the sound. And the sound is the sound of our heartbeat in unity, and we pray standing upon the island of Yanaguni, that the light go forth to the children of North Korea and South Korea; the lights of Taiwan and China, the light of Japan and that this grid of the Pacific long overlooked, now bring forth the connections also with the peoples of Hawaii, Easter Island, all these stepping stones of the early history that preceded this history. And again we ask the Divine (for even the Hawaiians also used the word *Aloha* which is also connected with *Elohim*) the vibration, the salutation to the sons and daughters of light of the Most High, to come forth and to bring light and balance. And so it is from the vibrations of the Elohim we see the unifying balance that must take place in the East as well as the Near East and the West.

As we draw all these grids together we realize the importance, so opening up the 12 meridians and hence, bringing together part of the Amazon and the mountain regions of Peru. We reach out to the tribal nations, and unity and the vibrations of the Great White Spirit and the vibrations of the spiritual teachers and masters of Godhead. We ask that the sacred truths of the elder brother, the sacred truths of the Tree of Life and all of its glory be repositioned within the mind's eye of the nations of the west. And balancing thus the East and the West, the North and the South we ask that the four doves come together and forming the Mandala of the Heavens bring forth the Kingdom of Light and the generation of the quantum change, the generation of the I AM, the generation of the Tree of Life. And so it is, and with thine Glory we are One as we say four times with the four directions the four Great Amens: *Amen, Amen, Amen and Amen*. We face a tremendous acceleration of all knowledge. We live in the time of an information revolution. But we also live in a time of a spiritual evolution which quickens us in so many ways. So it is very important for us to use this opportunity, collectively, to put our energies together and clearly focus on the sacred areas of the world that are being opened to us for the first time in thousands of years. These precious areas are revealing truths that the human race has been around much longer than thought. The human race, in prior eras, has used the power of the mind's eye, has used higher consciousness to literally, move mountains.

It is important as we seek unity amidst a world rapidly making choices towards dissolution of old nation states, or having an undercurrent of political disaster, to really be the Light that we came to be. To understand why we have been incarnated here at this present moment of history, to bring forth the highest and the most glorious use of the gifts of the I AM into our I am presence. The *Ehyeh Asher Ehyeh* is very much akin to the Indian chants of the East and the West and so in the activation of brothers and sisters throughout the world we are finding the common language of Light; we are finding the language of the Divine Mother and the Divine Father in unity and prayer and celebration. So let us always choose to be the Light in the midst of despair and political darkness so the old programming doesn't work. We are the hope to overcome the old programming. In that sense, the Book of Genesis continues.
